

Our Tap Water is Drinkable

Kobe City Waterworks Bureau

Here at the Kobe City Waterworks Bureau, we perform very thorough water quality management, so that we can provide you with "water that is safe and tastes great."

It's very
tasty!

What to do if a major earthquake occurs...

If a major earthquake occurs, there are cases where tap water will become unavailable.

In such an event, please find a container to hold water and head to the **"Disaster Water Supplying Station."**

You will be able to take home drinking water from the station.

A major earthquake occurs!

Tap water stops running!

Prepare a container!

Disaster Water Supplying Station

Site Logo

Residents can collect water in their containers on their own.
